international economics is unique despite the existence of numerous books of the same title it is true that no one volume can capture the entire state of the art of the subject but individuals can apply their own perspectives to identify crucial issues in the development of the field therefore rather than instructions to prepare surveys of subfields within international economics the contributors to this book were informed as follows your essay should present an affirmative but constructively critical look at your subject it is not meant to be a survey rather your task is to pinpoint crucial areas of development to offer a critical evaluation of what s going on in the field and where it might go your contribution would be your own personal statement of how you see things it should be written at the professional level beyond these general guidelines you may develop your essay as you see fit how much of international economics should be assigned to each author and how many contributions the book should have required careful consideration traditionally international economics has been divided into pure theory and monetary theory suggesting a simple division of the field but this dichotomy has been overturned by the emergence of literature that overlaps both theories an opposite approach would have been to separate international economics into twelve to fifteen areas each with a contributor this procedure divides the field into too many parts and consequently overlapping threads of development would be ignored
